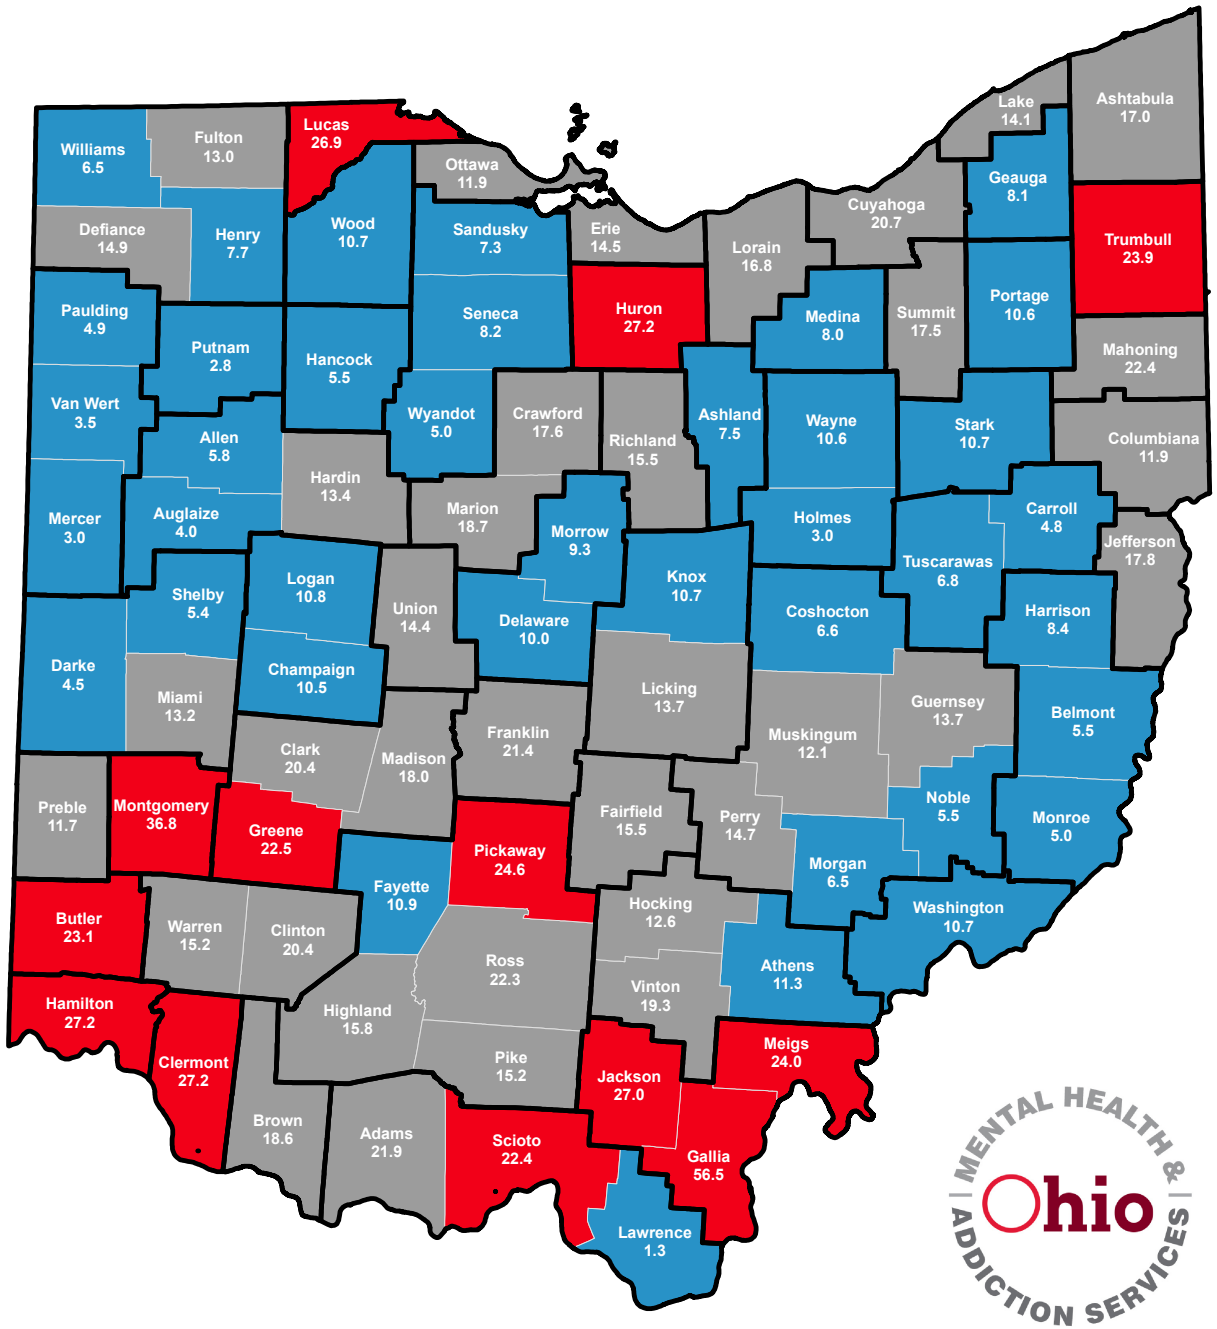
Hospital Admission Rates for Opiate-related Diagnoses per 10,000 Persons

Five-year Weighted Average from 2005 to 2009



Legend

ADAMHS Board

Rate per 10,000

- 1.3 - 11.7
- 11.8 - 22.4
- 22.5 - 56.5

Map Information:

This map examines hospital admission rates for opiate abuse, dependence or poisoning among persons admitted from emergency rooms into inpatient or observation settings as well as those persons treated and released from emergency rooms. On average, there were 18.5 hospital admissions per 10,000 persons statewide between 2005 and 2009. Counties with the highest hospital admission rates were Gallia (56.5), Montgomery (36.8) and Huron (27.2). Lawrence (1.3), Putnam (2.8) and Holmes (3.0) counties had the lowest hospital admission rates associated with opiate-related diagnoses.

Note: Alcohol, Drug Addiction and Mental Health Services (ADAMHS) Boards have black borders, and counties have white borders. Borders are black in cases where ADAMHS boards and counties have the same borders.
