- Providers can use the report to see how much money they have (should have) been paid by a particular board.
- By subtracting the "4 weeks prior" totals from the "current" totals boards and providers can tell how many claim lines and the net dollar amount of those claim lines were finalized for the four week period.

- The intention of these reports are to provide the boards and providers with information regarding claims that have been submitted to MACSIS.
 - The information on these reports reflect the claim details (claims status, processing status, etc.) at the time the report was created.
 - Not all reports are generated using the same method or criteria.
- Some boards generate additional reports for their providers. Questions about board generated reports should be directed to the board.
