

MACSIS Communication

835 5010 Update

Sent on: December 27, 2011

Background:

This communication is a status update to the 5010 835 issues that were communicated on 12/23/11.

Status Update: Application changes to correct the 5010 835 and mCPE 835 5010 Summary files have been applied to the MACSIS test environment and validation testing is currently taking place. Upon successful completion of the testing, 5010 835 files with postdates of 12/12/11 and 12/19/11 will be created for the effected providers. The mCPE website will also be populated with current 5010 835 file information.

We will continue to send updates as soon as additional information becomes available.

Board Action Required:

Continue to process 4010 claims, as normal. No action should be taken until further notice regarding 5010 claims.

Provider Action Required:

No action required at this time
