The board and service summary information are calculated using the agency data. This may cause the board area summary data to be somewhat different than the data in the Missing Data Report. "Equivalent" means less than 2% change. Decreases of more than 10% at an agency or more than 6% at a board are bolded. Size=Size of Caseload in Current year: XS<25 consumers; S<100, M <400, L<1200, XL>=1201.

The board and service summary information are calculated using the agency data. This may cause the board area summary data to be somewhat different than the data in the Missing Data Report. "Equivalent" means less than 2% change. Decreases of more than 10% at an agency or more than 6% at a board are bolded. Size=Size of Caseload in Current year: XS<25 consumers; S<100, M <400, L<1200, XL>=1201.

The board and service summary information are calculated using the agency data. This may cause the board area summary data to be somewhat different than the data in the Missing Data Report. "Equivalent" means less than 2% change. Decreases of more than 10% at an agency or more than 6% at a board are bolded. Size=Size of Caseload in Current year: XS<25 consumers; S<100, M <400, L<1200, XL>=1201.

The board and service summary information are calculated using the agency data. This may cause the board area summary data to be somewhat different than the data in the Missing Data Report. "Equivalent" means less than 2% change. Decreases of more than 10% at an agency or more than 6% at a board are bolded. Size=Size of Caseload in Current year: XS<25 consumers; S<100, M <400, L<1200, XL>=1201.
