

Prescription Opioid Doses per Capita

Ohio's Automated Rx Reporting System - 2010

Legend

 ADAMHS Board

Doses Per Capita

 18.5 - 61.2

 61.3 - 84.0

 84.1 - 130.9

Map Information:

This map displays per capita prescription opioid consumption. In 2010, the statewide average per capita dosage rate was 66.3 doses for every man, woman and child. Counties with the highest per capita rates were Jackson (130.9), Gallia (120.8) and Scioto (119.6). Counties with the lowest per capita dosage rates were Holmes (18.5), Mercer (38.4) and Geauga (41.2). Per capita rates are based on oral solids and transdermal patches. All opioid solutions and most buprenorphine combinations are excluded from the analyses except for Butrans, which is primarily used for pain management and not medication assisted treatment.

Note: Alcohol, Drug Addiction and Mental Health Services (ADAMHS) Boards have black borders, and counties have white borders. Borders are black in cases where ADAMHS boards and counties have the same borders.
