National College Health Assessment

The following questions ask about various aspects of your health. This survey is completely voluntary. You may choose not to participate or not to answer any specific questions. You may skip any question you are not comfortable answering. The survey is confidential. Broad contact information is destroyed before data are compiled to protect confidentiality. Composite data will then be shared with your campus for use in health promotion activities.

Demographics of Participating Institutions

Forty two postsecondary institutions self-selected to participate in the Fall 2010 ACHA National College Health Assessment and 30,263 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only those institutions that surveyed all students, or used a random sampling technique are included in the analysis, yielding a final data set consisting of 30,093 students and 39 schools. Demographic characteristics of the 39 campuses follow:
